Jess's aim is to create an interactive book for every kind of bride!

'The first thing I did when getting engaged is order a wedding planner book, and buy lots of bridal magazines, as well as create a wedding Pinterest board.... so why not create a one stop shop in a beautiful book which you could personalise. This was the one thing I found was missing, I didn't have anywhere to grab inspiration from and to input my vision!

As a bride we have to think about EVERYTHING & it can be very overwhelming. So a book is the perfect place to keep all information as well as gain inspiration.

My idea how the book would be structured & what it would contain is as follows-

Hardback.

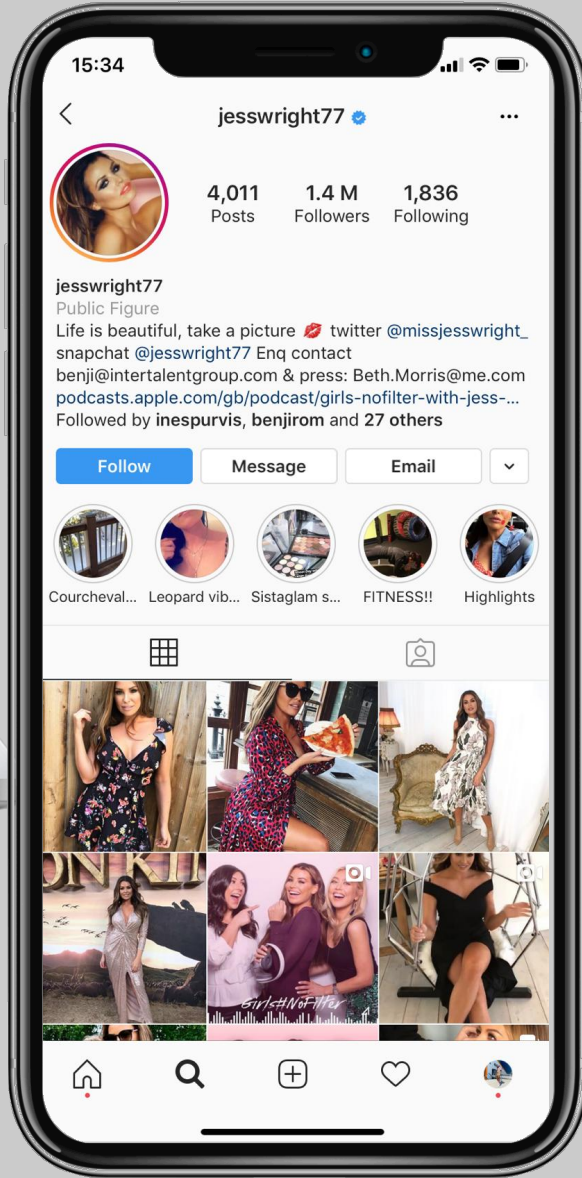

- An insert at the back for clippings from magazines/receipts/invoices etc.
- - chapters including ;guest list - names, emails, addresses, rsvp Table plan Budgets Appointments to do with dress fittings including inserts for Polaroid pics of specific dresses if desired 'Hen do' plans Bridesmaid section Venues Catering Entertainment And the list goes on....

I would love to create something aesthetically pleasing, as well as totally practical & useful for every stressed bride to make her life simpler. As believe me, speaking from first hand, we need it!!

I would love to personalise it & include some of my ideas for the perfect wedding. As-well as quotes throughout the book to encourage brides who are stressed out & also make them feel generally amazing as a woman getting married so uplifting and positive quotes. I would also love to share my story, with all the highs and lows'
